Relevant Coursework: Programing in Kotlin & C++, Computing in Python, Data Structures & Algorithms

SKILLS

- **Programming Languages**: *Python, C++, Java / Kotlin, SQL, JavaScript, Go*   **Technical Skills**: Expert
- **Framework / Tools**: *Spring Boot, Git, Pandas, NumPy, Flask, Excel, React, Docker*   **Tool-based Skills**: Advanced

PROJECTS

Tasklight – macOS Productivity App | jamesonzeller.com/tasklight
- Developed a Spotlight-style macOS app using **Go** and **React** (Wails) for rapid task capture in Notion.
- Built a backend with **Spring Boot** to handle usage tracking, AI quota enforcement, and user settings.
- Integrated **Notion OAuth**, global hotkey support, Apple Keychain for secure token storage, and **OpenAI-powered** natural language parsing.

Self-Hosted APIs – Personal Developer Platform
- Created and deployed multiple APIs using **Spring Boot** for task parsing, authentication flows, and utility services.
- Hosted on a TrueNAS-based home server with **Docker Compose**, using **Cloudflare Tunnels** to expose secure, production-ready endpoints.
